

Upgrade Audio Cables

Wireworld Upgrade Audio Cables combine the unique benefits of the Gold Tube plugs, Grain Optimized Oxygen-Free copper conductors, and the Symmetricoax™ cable design, to make dramatic improvements in clarity, dynamic impact and spatial effects, for a true upgrade over standard cables and other brands.

SOLSTICE® 5

"This cable uses two 'Symmetricoax' wires joined together, each one offering considerably lower inductance than conventional cables. The musical results are excellent, with very fine bass, sparkingly clear treble and quite remarkable detail."

- 2004 Product of the Year - HIFI CHOICE

ORBIT™ 5

Smaller versions of the Solstice designs that provide amazing sound quality per dollar.

RAINBOW™ 5.1

The cleanest, quietest and most versatile 6-channel home theater interconnect utilizes silver-clad OFC conductors and Teflon insulation to produce startling dynamic range and dazzling 3-D effects. The plugs are clearly labeled for easy installation.

***** - WHAT HIFI? SOUND AND VISION, May 2004

LUNA™ 5

As the least expensive cable with the superior Gold Tube plugs, Luna 5 provides incomparable sonic value.

TERRA™ 5

The Symmetricoax design enables Terra 5 to sound cleaner and more dynamic than other entry-level cables.

HORIZON 5²

The world's first Insta-Wire cable produces dramatically higher fidelity than any previous cable in its price range. It is also thin, flexible and incredibly easy to assemble.

STREAM 5²

This round Insta-Wire cable is the first direct replacement for twisted-pair installation speaker cable that provides greatly improved sound quality.

Premium Audio Cables

Wireworld Premium Audio Cables utilize the advantages of the patented Silver Tube connectors and the Symmetricoax cable design to provide exciting improvements in sonic realism. The astonishing transparency and dynamic preservation of these cables can turn a good audio system into one that sounds truly remarkable.

Silver Tube™ plugs

Tubular silver-clad OFC contacts and silicone rubber tension band minimize connection losses for state-of-the-art sound quality. U.S. Patent 5,413,503

EQUINOX® 5

"A terrific sense of the reverberation of the space sounded through the architecture. Perhaps a powerful feeling of dynamic freedom added to this impression of size, as well. It was as if the cables somehow played louder than the others I had on hand..."

- Neil Gader, THE ABSOLUTE SOUND, issue #121

ATLANTIS™ 5

Atlantis 5 interconnects and speaker cables reveal a wealth of sonic details lost by lesser cables. The earlier generations of Atlantis earned the reputation of being one of the best values in the world of audio. The fifth generation Atlantis cables continue that tradition, earning Editors Choice awards in both HiFi News and The Absolute Sound magazines.

OASIS® 5

The Oasis 5 cables are the least expensive models equipped with the state-of-the-art Silver Tube plugs and silver-clad OFC spades. The combined benefits of these amazing connectors, OCC copper conductors, and the dynamic sound of the Symmetricoax design, make the Oasis 5 cables an incomparable value.
